Anti-Terrorism

SCI is structured around the belief that the most important asset we contribute is the ability to help our clients protect their business and staff against all eventualities including terrorism.

SCI provides the following services for anti-terrorism security:

- Terrorist threat assessment for countries, organisations and facilities.
- Personal security and anti-terrorist design and project management.
- Security master planning and systems design and specification for perimeter, access and CCTV surveillance of areas vulnerable to terrorism.
- Parking controls to reduce bomb blast to buildings.
- Building hardening against blast.
- Blast absorption technologies TABRE and PMG.
- Blast curtains, films and shutters.
- CBRN protection.
- Chemical and biological detection equipment.
- Nuclear and chemical and biological shelters.
- Establishment of blast safe havens in buildings.
- Anti-terrorist training including planning, spotting reconnaissance and exploiting weaknesses.
- Anti-terrorism training services
- Anti-terrorist Aide Memoires and guarding staff training projects.
- Office and staff X-ray and checking systems.
- Bomb threat response planning and explosive protection for buildings and X-ray systems.
- Disaster recovery and computerised risk analysis.

SCI's Anti-terrorist Security Projects and Experience

Security Consultancy has many years' experience working in the anti-terrorist security sector. Projects on which our consultants have worked include:

- Al Faisaliah bomb detection and CCTV surveillance and blast protection.
- Al Faisaliah parking control vehicle bomb review.
- ANB building parking area review, road blockers and X-ray technology.
- Bangkok Fuel and Aviation anti-terrorist survey for the planned fuel depot at the new airport.
- Government office survey and bomb threat response plan and evacuation plan.
- Police headquarters project to provide CCTV to potential mortar base plate positions.

SCI Pte Delivers:

- A detailed terrorist threat assessment.
- A review and report on the effectiveness of existing security anti-terrorist measures.
- Recommendations on equipment, systems, policy, procedures and training to improve security.
- A detailed specification of all agreed equipment to be sent out for competitive tender.
- Tender evaluation, project management and commissioning of system.
